What Can I Do?

Sewer spills pollute the Monterey Bay and have harmful effects on local marine life. Following these steps will help prevent sewer backups and spills:

Derrames de alcantarillado contaminan la bahía de Monterey y tienen efectos nocivos sobre la vida marina local.

- 1.** Pour cooled fats, oils and grease into a covered, disposable container and throw it into your garbage. Never pour fats, oil, or grease down sink drains or toilet.

Coloque las grasas y los aceites fríos en un contenedor desechable con tapa y tirelo a la basura. Nunca eche las grasas en los drenajes de su casa.

- 2.** Soak up spilled oils and grease with an absorbent material such as paper towels or kitty litter and throw into your garbage. Do not push large amounts of food into your garbage disposal.

Absorba las grasas y los aceites restantes con un material absorbente como servilletas de papel y tirelos a la basura.

- 3.** Before you wash dishes, scrape food scraps, fats, oils and grease into your garbage. Do not push large amounts of food into your garbage disposal.

Antes de lavar los platos, tire los restos de alimentos, grasas y aceites en la basura.

- 4.** Use sink strainers to catch any remaining food waste while washing dishes.

Utilice coladores para fregaderos al lavar los platos para atrapar los restos de comida restantes.
