**Type of Services**

**Phase I Environmental Site Assessment  
and Limited Subsurface Investigation**

**Location**

**2755 41<sup>st</sup> Avenue  
Soquel, California**

## **SECTION 1: INTRODUCTION**

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed at 2755 41<sup>st</sup> Avenue in Soquel, California (Site) as shown on Figures 1 and 2. This work was performed for Hunter Development Partners, LLC in accordance with our June 2, 2022 Agreement (Agreement).

### **1.1 PURPOSE OF PHASE I ESA**

The scope of work presented in the Agreement was prepared in general accordance with ASTM E1527-13 and E1527-21 titled, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, “Standards and Practices for All Appropriate Inquiries; Final Rule” (AAI Rule, 40 CFR Part 312). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the Site.

As defined by ASTM E1527-21, the term Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition<sup>1</sup> is not a recognized environmental condition.

Cornerstone Earth Group, Inc. (Cornerstone) understands that Hunter Development Partners, LLC intends to purchase Site for commercial or residential development. We performed this Phase I ESA to support Hunter Development Partners, LLC in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

---

<sup>1</sup> A de minimis condition is defined by the ASTM Standard as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

## 1.2 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this study included the following:

- A reconnaissance of the Site to note readily observable indications of significant releases of hazardous materials to structures, soil, soil vapor or groundwater.
- Drive-by observation of adjoining properties to note readily apparent activities involving hazardous materials that have or could significantly impact the Site.
- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents on-Site or at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Historical research including review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Interviews with persons reportedly knowledgeable of current and/or prior Site uses, including the current Site owner and occupant(s).
- Collection of soil and soil vapor samples for laboratory analyses.
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA are presented in Section 11.

## 1.3 ASSUMPTIONS

In preparing this Phase I ESA, Cornerstone can neither warrant nor guarantee that records obtained from or prepared by other parties, such as, but not limited to, regulatory agency records, interview responses, maps, related documents, and environmental reports prepared by others are accurate or complete. Cornerstone relied on the information obtained during this study unless we had actual knowledge that the information was incorrect or unless it was obvious that the information was incorrect based on other information obtained. We also assumed that the boundaries of the Site, based on information provided by Hunter Development Partners, LLC, are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

## 1.4 ENVIRONMENTAL PROFESSIONAL

This Phase I ESA was performed by Stason I. Foster, P.E. and Kurt M. Soenen, P.E. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 C.F.R. Part 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the All

Appropriate Inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

## SECTION 2: SITE DESCRIPTION

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

### 2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the Site, based on information provided by Hunter Development Partners, LLC

**Table 1. Location and Ownership**

|                                    |  |
|------------------------------------|--|
| <b>Assessor's Parcel No. (APN)</b> | 030-121-61   |
| <b>Reported Address/Location</b>   | 2755 41 <sup>st</sup> Avenue, Soquel, California<br>(Unincorporated Santa Cruz County) |
| <b>Owner</b>                       | Blam-Jade, LP  |
| <b>Approximate Lot Size</b>        | 2.58 acres   |

In addition to the current address listed in Table 1, multiple historical addresses for the Site were identified during our review of information obtained during this study. These include 2815, 2821 and 2851 41<sup>st</sup> Avenue, and 3820, 3822, 3900, 3904, 3906 and 3912 Soquel Drive. The historical addresses also were researched during this Phase I ESA.

### 2.2 CURRENT/PROPOSED USE OF THE SITE

The current and proposed uses of the Site are summarized in Table 2.

**Table 2. Current and Proposed Uses**

|                     |                           |
|---------------------|---------------------------|
| <b>Current Use</b>  | Undeveloped land          |
| <b>Proposed Use</b> | Commercial or residential |

### 2.3 SITE SETTING AND ADJOINING PROPERTY USE

Land use in the general Site vicinity appears to be primarily commercial. During the Site visit, adjoining properties were observed from the Site and from adjacent public thoroughfares. Based on our Site vicinity reconnaissance, adjoining property uses are summarized below in Table 3.

**Table 3. Adjoining Property Uses**

|              |  |
|--------------|--|
| <b>North</b> | Commercial businesses (Honda dealership, smog check and auto repair businesses and a UPS store).   |
| <b>South</b> | Commercial businesses (Cruz Car Wash and gasoline station, Vanit Beauty Parlour, and Discretion Brewing)                                     |
| <b>East</b>  | Commercial businesses (restaurants, offices, and beauty salons). The Site also borders a residential parcel at 2831 41 <sup>st</sup> Avenue. |

Although some occupants of adjoining properties likely use and store hazardous materials (e.g., Cruz Car Wash/gasoline station and automobile repair businesses), which is common in commercial areas, no chemical storage immediately adjacent to the Site was apparent and no evidence of spills or other conditions on the adjoining properties were observed that are considered indicative of Recognized Environmental Conditions at the Site. Additionally, the adjoining gasoline station is located down- or cross-gradient of the Site with respect to the anticipated groundwater flow direction.

### **SECTION 3: USER PROVIDED INFORMATION**

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is Hunter Development Partners, LLC. The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions in connection with the Site, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

#### **3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS**

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property’s use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

A Preliminary Title Report by First American Title Insurance Company dated April 22, 2022 was provided for our review. No environmental liens or AULs associated with the Site were listed in the title report.

**3.2 SPECIALIZED KNOWLEDGE, COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION, AND PROPERTY VALUE**

Based on information provided by or discussions with Hunter Development Partners, LLC, we understand that Hunter Development Partners, LLC does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site, or other information that is material to Recognized Environmental Conditions, except for the information contained in the provided documents described in Section 3.3. The anticipated purchase price of the Site reportedly reflects fair market value and is not believed by Hunter Development Partners, LLC to have been lowered due to contamination.

**3.3 DOCUMENTS PROVIDED BY HUNTER DEVELOPMENT PARTNERS, LLC**

To help evaluate the presence of Recognized Environmental Conditions at the Site, Cornerstone reviewed and relied upon the documents provided by Hunter Development Partners, LLC listed in Table 4. Please note that Cornerstone cannot be liable for the accuracy of the information presented in these documents. ASTM E1527-21 does not require the Environmental Professional to verify independently the information provided; the Environmental Professional may rely on the information unless they have actual knowledge that certain information is incorrect. A summary of the provided documents is provided below; please refer to the original reports for complete details.

**Table 4. Documents Provided by Hunter Development Partners, LLC**

| <b>Date</b>    | <b>Author</b>                      | <b>Title</b>   |
|----------------|------------------------------------|--|
| April 21, 2016 | Sierra Delta Consultants LLC (SDC) | Phase I Environmental Site Assessment, 3820 & 3906 Soquel Drive and 2755, 2815 & 2821 41 <sup>st</sup> Avenue, Soquel, California. |
| April 26, 2017 | Sierra Delta Consultants LLC (SDC) | Phase I Environmental Site Assessment, 3912 Soquel Drive and 2851 41 <sup>st</sup> Avenue, Soquel, California.                     |

Based on the information reviewed, the 3912 Soquel Drive and 2851 41<sup>st</sup> Avenue parcels were previously occupied by a self-service car wash and a commercial building occupied by King’s Paint & Paper, respectively. The car wash reportedly was built between 1993 and 2003 and the commercial structure was built in 1946. A residential structure was noted to have previously been present at the car wash location.

The 3820 Soquel Drive parcel was occupied by a storage yard at the time of the 2016 Phase I ESA and several residences built between the 1920s and 1940s, along with associated outbuildings were located on other Site parcels (the multiple prior Site parcels have been combined into a single APN).

SDC (2016 and 2017) indicated that their studies did not reveal any Recognized Environmental Conditions associated with the Site.

## **SECTION 4: RECORDS REVIEW**

### **4.1 STANDARD ENVIRONMENTAL RECORD SOURCES**

Cornerstone conducted a review of federal, state and local regulatory agency database records provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E1527-21. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix A.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with respect to the Site. The customary practice is to review information from standard sources that is reasonably ascertainable within reasonable time and cost constraints.

#### **4.1.1 On-Site Database Listings**

Blam-Jade, LP was identified at the Site addresses of 2755, 2815 and 2821 41<sup>st</sup> Avenue on the HAZNET database, which contains data extracted from the copies of hazardous waste manifests received each year by the DTSC. Wastes disposed between in 2017 were categorized as asbestos containing waste.

Nissan of Soquel was identified on the Site address of 3820 Soquel Drive on the National Pollutant Discharge Elimination System (NPDES) database and the California Integrated Water Quality System (CIWQS) database. These listings appear to be associated with the Water Board's stormwater program that regulates stormwater discharges during construction activities. The construction of car dealership previously was planned at the Site; the database listings were identified as having been terminated in 2021.

King's Paint & Paper at 2851 41<sup>st</sup> Avenue was listed on the Certified Unified Program Agency (CUPA) database as a facility with permits for storage of hazardous materials.

#### **4.1.2 Adjoining Property Database Listings and Nearby Spill Incidents**

Cruz Car Wash and Raintree Car Wash on the southerly adjoining property (2731 41<sup>st</sup> Avenue) were identified on several regulatory agency databases indicating the presence of underground storage tanks (USTs) and the storage of hazardous materials. The property was noted to have been used as a gasoline station and car wash since the 1970s.

Soquel Smog Check, Fabian's Body Shop, Old Volks Home at 3921 Soquel Drive, and Cappel Management and Ocean Honda Chevrolet at 3801 Soquel Drive were identified on northerly adjoining parcels on regulatory agency databases indicating the storage of hazardous materials and generation of hazardous waste.

The database listings noted above relate primarily to regulatory filings associated with hazardous material use/storage, and generation or disposal of hazardous wastes. Such listings

are common for commercial facilities in urban settings and are not indicative of hazardous material releases; thus, further review of records associated with these listings does not appear warranted.

Two closed leaking underground storage tank (LUST) cases were identified on adjoining properties including 1) Ocean Honda Chevrolet at 3801 Soquel Drive, located across Soquel Drive to the north, and 2) the property at 4100 Soquel Drive, formerly occupied by a Texaco gasoline station, located across 41<sup>st</sup> Avenue to the east. To obtain additional information regarding these two LUST cases, a cursory review of readily available documents obtained from the state Geotracker (<http://geotracker.waterboards.ca.gov>) database was performed. Geotracker is a database and geographic information system (GIS) that provides online access to environmental data. It tracks regulatory data about leaking underground storage tank (LUST), Department of Defense, Site Cleanup Program and Landfill sites.

Available information within the Geotracker database regarding Ocean Honda Chevrolet at 3801 Soquel Drive and the former Texaco station at 4100 Soquel Drive does not indicate that spill incidents at these properties have significantly impacted the Site. The potential for identified contaminants at these properties to have significantly migrated to the Site appears low.

## 4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

### 4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to 2755 41<sup>st</sup> Avenue at the following public agencies: the Santa Cruz County Building Department (BD) and the Santa Cruz County Department of Environmental Health (DEH). The information reviewed is summarized in Table 5.

**Table 5. File Review Information**

| Agency Name                        | Date          | Occupant  | Remarks   |
|------------------------------------|---------------|-----------|---|
| <b>2755 41<sup>st</sup> Avenue</b> |               |           |   |
| BD                                 | 1973          | NA        | Plumbing permit.  |
| BD                                 | 2000 and 2017 | Residence | Permits for special inspections to determine if single family dwelling meets code requirements to be relocated. |
| BD                                 | 2013          | Residence | Roofing permit.   |
| BD                                 | 2018          | Residence | Demolition permit.  |
| <b>2815 41<sup>st</sup> Avenue</b> |               |           |   |
| BD                                 | 2000 and 2017 | Residence | Permits for special inspections to determine if single family dwelling meets code requirements to be relocated. |
| BD                                 | 2011          | Residence | Permit for alterations  |
| BD                                 | 2018          | Residence | Demolition permit.  |
| <b>2821 41<sup>st</sup> Avenue</b> |               |           |   |
| BD                                 | 2000 and 2017 | Residence | Permits for special inspections to determine if single family dwelling meets code requirements to be relocated. |

| Agency Name                        | Date          | Occupant                    | Remarks  |
|------------------------------------|---------------|-----------------------------|--|
| BD                                 | 2003          | Residence                   | Roofing permit.  |
| BD                                 | 2018          | Residence                   | Demolition permit.   |
| <b>2851 41<sup>st</sup> Avenue</b> |               |                             |  |
| BD                                 | 1959          | NA                          | Permits to demolish and rebuild a garage   |
| BD                                 | 1973          | NA                          | Permit for windows and interior wall.  |
| BD                                 | 1974          | Coast Lighting and Hardware | Permit to maintain and conduct a retail electrical and hardware store.   |
| BD                                 | 1999          | Store                       | Roofing permit.  |
| BD                                 | 2005          | King's Paint                | Roofing permit.  |
| BD                                 | 2008 and 2009 | Storage/warehouse           | Permits for fire damage repairs.   |
| DEH                                | 2009 to 2017  | King's Paint & Paper        | Inspection reports. No violations indicative of spills were reported.  |
| DEH                                | 2009 and 2017 | King's Paint & Paper        | Chemical inventories listing various paint-related products stored mainly in 1- and 5-gallon containers.   |
| DEH                                | 2009 to 2017  | King's Paint & Paper        | Permits for hazardous materials storage.   |
| DEH                                | 2018          | King's Paint & Paper        | Inspection report. Business noted to be closed and all hazardous materials and wastes were removed.  |
| BD                                 | 2018          | Paint store                 | Demolition permit.   |

#### 4.2.2 Geologic Energy Management Division Maps

To evaluate the presence of oil or gas wells on-Site and in the immediate Site vicinity, maps available on-line at the California Department of Conservation, Geologic Energy Management Division (CalGEM) website were reviewed. Review of the available map for the Site area did not show oil or gas wells on-Site or on the adjacent properties.

### SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

#### 5.1 RECENT USGS TOPOGRAPHIC MAP

A 2018 USGS 7.5 minute topographic map was reviewed to evaluate the physical setting of the Site. The Site's elevation is approximately 125 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the southeast towards the Pacific Ocean.

#### 5.2 HYDROGEOLOGY

Based on information presented in the California Geotracker database pertaining to nearby properties, groundwater beneath the Site is likely present at a depth of approximately 80 feet. Variable groundwater flow directions have been reported in the Site vicinity including southeast, east and northeast.

### SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and adjoining properties in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the Site. The ASTM standard requires the identification of all obvious uses of the Site from the present back to the Site's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources. The identification of obvious uses of adjoining properties also is required.

#### 6.1 HISTORICAL SUMMARY

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 6.

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1931 and 2016 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix B.
- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historic topographic maps dated 1912, 1914, 1954, 1968, 1987, 1994, 2012, 2015 and 2018; copies of historic topographic maps reviewed are presented in Appendix B.
- **Historical Fire Insurance Maps:** EDR reported that the Site was not within the coverage area of fire insurance maps.

**Table 6. Summary of Historical Source Information**

| Date                                  | Source             | Comments   |
|---------------------------------------|--------------------|--|
| 1912 and 1914                         | Topographic maps   | <p><b>Site:</b> No structures were depicted.</p> <p><b>Adjoining Properties:</b> Small structures typical of residences are shown on some of the adjoining parcels.</p>  |
| 1931, 1940, 1943, 1956, 1968 and 1974 | Aerial photographs | <p><b>Site:</b> Several small structures that appear to be residences and associated outbuildings are shown on-Site. Portions of the Site near the southern and western boundaries also appear to have been potentially used for agricultural purposes during the 1930s. By 1940, the commercial building formerly occupied by King’s Paint &amp; Paper is shown on the northeast corner of the Site. Additional residential structures are shown to have been constructed on-Site by the 1950s, along with an apparent commercial structure on the northwest corner of the Site.</p> <p><b>Adjoining Properties:</b> Agricultural uses and residential structures appear predominant during the 1930s and 1940s. A commercial facility was constructed to the west by the mid-1950s and a gasoline station was constructed to the east by the late-1960s.</p> |
| 1954 and 1968                         | Topographic maps   | <p><b>Site:</b> Small structures typical of residences are shown on some of the Site parcels.</p> <p><b>Adjoining Properties:</b> Small structures typical of residences are shown on some of the adjoining parcels.</p>   |
| 1982 and 1993                         | Aerial photographs | <p><b>Site:</b> The commercial building on the northwest corner of the Site is shown to have been removed. The remainder of the Site appears similar to the 1974 photograph.</p> <p><b>Adjoining Properties:</b> The existing car wash/gasoline station to the south was constructed by 1982. Additional commercial development also is apparent to the north.</p>   |
| 1987                                  | Topographic map    | <p>The Site and adjoining properties are shown within the urban developed area of Soquel.</p>  |
| 1994                                  | Topographic map    | <p><b>Site:</b> Several small structures typical of residences are shown on-Site along with the commercial building formerly located on the northeast corner of the Site.</p> <p><b>Adjoining Properties:</b> Shown to be developed with a mix of commercial and residential structures.</p>   |

| Date                | Source             | Comments  |
|---------------------|--------------------|---|
| 2005 to 2016        | Aerial photographs | <p><b>Site:</b> A self-service car wash is shown to have been constructed on the northern portion of the Site by 2005, replacing former structures. The western portion of the Site appears to be used as an exterior storage yard. The remainder of the Site appears similar to the prior photographs.</p> <p><b>Adjoining Properties:</b> The existing Honda dealership to the north and commercial development to the east area shown to have been completed by the mid- and late-2000s, respectively.</p> |
| 2012, 2015 and 2018 | Topographic maps   | No specific features are depicted.  |

### 6.1.1 City Directory Review

To obtain additional information regarding past uses of the Site and adjoining properties, business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1960 through 2017. A summary of the city directory listings for commercial Site occupants is presented in Table 7.

Based on the directories researched, listed commercial businesses at adjoining properties include Ocean Honda, various auto repair businesses, and other commercial businesses to the north; Cruz Car Wash (formerly Raintree Car Wash & Chevron) to the south; various restaurants, Safeway, beauty salons, a credit union, a Texaco service station and other commercial businesses to the east; and San Lorenzo Lumber/ProBuild to the west. The acquired city directory report is presented in Appendix C and provides additional details.

**Table 7. On-Site City Directory Listings**

| Date                               | Occupant   |
|------------------------------------|--|
| <b>2755 41<sup>st</sup> Avenue</b> |  |
| 1980                               | Mrs. Starr (palm reader)                                   |
| 1985                               | Royal Service & Sales (small appliances)                   |
| 1992                               | Cellular Service Center                                    |
| 1995                               | Shaffer Communications                                     |
| <b>2851 41<sup>st</sup> Avenue</b> |  |
| 1960                               | Johnny's Food Market                                       |
| 1975 and 1980                      | Coast Lighting & Hardware                                  |
| 1985                               | King's Paint & Paper and Spencer's Audio Video Service Co. |
| 1992, 1995, 2000 and 2005          | King's Paint & Paper and Plumbed Elegance                  |
| 2010, 2014, 2017                   | King's Paint & Paper                                       |
| <b>3900 Soquel Drive</b>           |  |
| 1960                               | Gilbert Richards Real Estate                               |
| <b>3912 Soquel Drive</b>           |  |
| 1960                               | Ted's Motorcycle Shop                                      |
| 1964                               | Laundromat   |
| 1971, 1975 and 1980                | Royal Service and Sales Shop                               |
| 1985                               | Santa Cruz Building (remodeling and construction)          |
| 1995                               | Computer Jones   |
| <b>3820 Soquel Drive</b>           |  |

| Date                | Occupant                          |
|---------------------|-----------------------------------|
| 1960 and 1964       | Garbini's Inn Restaurant          |
| 1971, 1975 and 1980 | Art & Walt's Original Garbini Inn |
| 1985                | Vacant                            |
| 1992                | Round Up Recycling                |

## SECTION 7: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 8. Photographs of the Site are presented in Section 7.2.1.

### 7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on June 2, 2022. The Site reconnaissance was conducted by walking representative areas of the Site and the Site periphery. The Site also was observed from all adjacent public thoroughfares. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included tall grass and weeds that covered portions of the Site.

### 7.2 OBSERVATIONS

At the time of our visit, the Site was observed to consist of undeveloped land. Several trucks, automobiles, and miscellaneous other stored equipment and materials were present on-Site, mainly within a fenced area on the western portion of the Site. Two homeless encampments containing a variety of miscellaneous belongings and discarded items were present, one at the southwest corner of the Site and the other on the central portion of the site (west of the 2831 41<sup>st</sup> Avenue parcel). A few small containers of automotive related hazardous materials (e.g., lubricants and antifreeze), an automotive battery and a 2-gallon safety can possibly containing gasoline were present within the fenced encampment at southwest corner of the Site. The other encampment was not accessed. No evidence of hazardous materials spills was observed.

**Table 8. Summary of Readily Observable Site Features**

| General Observation                                   | Comments                                       |
|---|--|
| Aboveground Storage Tanks                             | Not Observed                                   |
| Agricultural Wells                                    | Not Observed                                   |
| Air Emission Control Systems                          | Not Observed                                   |
| Boilers   | Not Observed                                   |
| Burning Areas (waste burn pits or ash disposal areas) | Not Observed                                   |
| Chemical Mixing Areas                                 | Not Observed                                   |
| Chemical Storage Areas                                | Limited quantities observed as described above |
| Drainage Ditches                                      | Not Observed                                   |
| Drums, Totes, and Intermediate Bulk Containers        | Not Observed                                   |
| Elevators   | Not Observed                                   |

|   |              |
|---|--------------|
| Emergency Generators  | Not Observed |
| Equipment Maintenance Areas   | Not Observed |
| Fill Placement ( <i>i.e.</i> , fill used to build up the site elevations) | Not Observed |
| Groundwater Monitoring Wells  | Not Observed |
| Hoods and Ducting (associated with chemical use)                          | Not Observed |
| Hydraulic Vehicle or Equipment Lifts                                      | Not Observed |
| Incinerators  | Not Observed |
| Petroleum Pipelines or Wells  | Not Observed |
| Pits, Ponds, or Lagoons.  | Not Observed |
| Railroad Lines  | Not Observed |
| Row Crops or Orchards   | Not Observed |
| Septic Systems or Cesspools   | Not Observed |
| Solid Waste Disposal Areas (other than municipal trash containers)        | Not Observed |
| Stained Soil or Pavement  | Not Observed |
| Stains or Corrosion on Floors, Walls, or Ceilings                         | Not Observed |
| Standing Surface Water or Pools   | Not Observed |
| Stockpiles of Soil or Debris  | Not Observed |
| Stressed Vegetation (unrelated to the lack of water)                      | Not Observed |
| Strong, Pungent, or Noxious Odors   | Not Observed |
| Sumps, Clarifiers, Oil-Water Separators, or similar structures            | Not Observed |
| Transformers  | Not Observed |
| Underground Storage Tanks   | Not Observed |
| Unidentified Substance Containers   | Not Observed |
| Vehicle Maintenance Areas   | Not Observed |
| Vehicle Wash Areas  | Not Observed |
| Wastewater Neutralization Systems   | Not Observed |

The comment "Not Observed" does not warrant that these features are not present on-Site; it only indicates that these features were not readily observed during the Site visit.

### 7.2.1 Site Photographs

Photograph 1. View of the Site looking south.

Photograph 2. View of the Site looking east.

Photograph 3. View of the Site looking west.

Photograph 4. View of the Site looking north.

Photograph 5. Fenced homeless encampment (southwest corner of the Site).

Photograph 6. Homeless encampment (southwest corner of the Site).

## **SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS**

### **8.1 ENVIRONMENTAL QUESTIONNAIRE / CURRENT OWNER INTERVIEW**

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire for completion by the Site owner (Blam-Jade, LP). The completed questionnaire is attached in Appendix D. The information provided on the questionnaire appears generally consistent with our on-Site observations and information obtained from other data sources. No information indicative of Recognized Environmental Conditions was reported on the questionnaire.

### **8.2 CURRENT OCCUPANT INTERVIEW**

The Site was not occupied at the time of our visit. No occupant interview was conducted.

### 8.3 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

### 8.4 INTERVIEWS WITH STATE AND/OR LOCAL GOVERNMENT OFFICIALS

Per the ASTM Standard, a reasonable attempt should be made to interview at least one staff member of any one of the following types of state and/or local government agencies: fire department, health department, building department, or other agency having jurisdiction over hazardous waste disposal or other environmental matters in the area.

The Santa Cruz County Building Department and the Santa Cruz County DEH were contacted<sup>2</sup> during this study. The DEH is the Certified Unified Program Agency (CUPA) responsible for implementing California's Unified Hazardous Waste and Hazardous Materials Management regulatory program for properties within Soquel. Files pertaining to the Site were obtained from each of these agencies; a summary of the information obtained was discussed in Section 4.2.1.

## SECTION 9: LIMITED SOIL AND SOIL VAPOR QUALITY EVALUATION

Based on information obtained for this Phase I ESA, portions of the Site may have historically been used for agricultural purposes, to which pesticides may have been applied in the normal course of farming operations. Additionally, soil adjacent to structures that are painted with lead-containing paint can become impacted with lead as a result of the weathering and/or peeling of painted surfaces. Soil near wood framed structures also can be impacted by pesticides historically used to control termites. Therefore, soil sampling was performed to evaluate soil quality within the potential former agricultural areas and also near former on-Site structures.

To evaluate soil vapor quality, soil vapor samples were collected from six locations at the Site. Soil vapor samples SV-1 through SV-4 were collected on the northern portion of the Site in the area of the former on-Site car wash and paint store, and to evaluate potential impacts from the off-Site closed LUST cases at 3801 Soquel Drive (Ocean Honda Chevrolet) and 4100 Soquel Drive (formerly a Texaco gasoline station). Soil vapor samples SV-5 and SV-6 were advanced on the southern portion of the Site to evaluate potential impacts associate with the off-Site adjacent car wash and gasoline station at 2731 41<sup>st</sup> Avenue (Cruz Car Wash and Raintree Car Wash).

The soil and soil vapor sample locations are shown on Figure 2.

### 9.1 SOIL SAMPLE COLLECTION AND ANALYSES

On June 13, 2022, thirteen soil samples (S-1 through S-13) were collected from a depth of approximately 0 to ½ foot using hand sampling equipment. Soil samples obtained using hand sampling equipment were collected in clean stainless steel liners. After collection, the ends of the liners were covered in a Teflon film, fitted with plastic end caps, and labeled with a unique

---

<sup>2</sup> Note that at some agencies, files are available on-line and accessed electronically via the agencies' website. Based on our professional experience, the acquisition and review of Site-related files from these multiple agencies provides information that is more useful in the evaluation of Recognized Environmental Conditions than interviewing a "staff member".

sample identification number. The samples were then placed in an ice-chilled cooler and transported to a state-certified laboratory with chain of custody documentation.

The soil samples were analyzed for organochlorine pesticides (OCPs, EPA Test Method 8081), arsenic, and lead (EPA Test Method 6010B).

## **9.2 SOIL VAPOR SAMPLE COLLECTION AND ANALYSES**

On June 13, 2022, Cornerstone performed a subsurface investigation and advanced six borings to approximate depths of 15 feet using Direct Push Technology and the dual wall sampling system. The borings were converted to multi-depth soil vapor probes. The multi-depth subsurface probes consisted of a stainless-steel expendable vapor tip installed at approximate depths of 5 feet, and a deeper vapor tip installed at 10 or 15 feet. Due to the presence of perched groundwater observed at locations SV-3 (approximate depth of 11 feet) and SV-4 (approximate depth of 10 feet), the borings were backfilled with hydrated bentonite to an approximate depth of 10 feet and the deeper vapor probe tip was installed above the bentonite. Although groundwater was not observed at locations SV-1 and SV-5, the boring was backfilled with hydrated bentonite to an approximate depth of 10 feet to attempt to collect a deeper soil vapor sample from a more permeable layer; the deeper vapor probe tip was installed above the bentonite. At locations SV-2 and SV-6, the deeper vapor probe tips were installed at 15 feet.

The vapor probe tips were affixed to Teflon tubing. The vapor probes were constructed by first placing approximately 2 inches of coarse aquarium sand into the bottom of the borehole using a tremie pipe. The stainless-steel tip and tubing were then lowered into the borehole via a tremie pipe. Additional sand was then placed in the borehole via tremie to create an approximately 1-foot sand pack interval around the vapor tip. Approximately 1 foot of granular bentonite (Benseal™) was placed on top of the sand pack via the tremie pipe. Bentonite “gel” was placed via tremie pipe on top of the dry granular bentonite to the bottom depth of the upper sand pack hosting the shallower vapor tip. Prior to installing the upper-sand pack, an approximately 1-foot layer of dry granular bentonite was placed on top of the hydrated bentonite (using a tremie pipe) to help prevent settling of the upper-sand pack. The upper vapor point screen interval was constructed similar to the lower and the remainder of the borehole sealed to surface utilizing the hydrated bentonite procedures. The Teflon tubing was labeled with depth of placement and capped utilizing a vapor tight Swagelok valve set in the “off” position.

The vapor probes were sampled at least two hours after their installation. The tubing emanating from the vapor points was affixed to a sample shutoff valve in the “off” position during the time needed to reach equilibrium (at least 2 hours). A 167 milliliters-per-minute flow regulator inclusive of particulate filter was fitted to the shutoff valve and the other end to a “T” fitting. One end of the “T” was connected to the sampling summa canister. The other end of the “T” was affixed to a digital vacuum gauge and a 1-liter summa canister utilized for purging.

A minimum 10-minute vacuum tightness test was performed on the manifold and connections by opening and closing the 1-liter purge canister valve and applying and monitoring a vacuum on the vacuum gauge. The sample shut-off valve on the downhole side of the sampling manifold remained in the “off” position. When gauge vacuum had maintained for at least 10 minutes without any noticeable decrease (less than approximately 0.1 inches of mercury (Hg) for properly connected fittings), purging began. The downhole shut off valve was opened and three pore volumes were removed utilizing the purging summa. Purge volumes of vapor were

removed and verified by the calculated pressure drop in the 1-liter summa canister utilized for purging.

Isopropyl alcohol was utilized as a leak detection compound during sampling by applying 5 drops to cotton gauze and placing the moistened gauze near the borehole. Sampling began by opening the summa canister valve. Immediately upon opening the sampling valve, a shroud was placed over and enclosed the atmosphere of the borehole and entire sampling train including all connections.

Sampling continued until the vacuum gauge indicated approximately 5 inches of Hg remaining. A datalogging photoionization detector (PID) utilized during sampling to monitor the atmosphere inside the shroud through a bulkhead fitting. The logged data (at minimum thirty [30] second intervals) was corrected to parts per million by volume isopropyl alcohol concentrations and utilized to evaluate the integrity of the sampling train. To confirm the isopropyl alcohol atmosphere, one confirmation sample was collected from the shroud atmosphere through the sampling port of the PID.

Due to low permeability soil surrounding the 5-foot probes at locations SV-2 and SV-6, and from the 10-foot probes at locations SV-3, SV-4, and SV-5, a sufficient volume of soil vapor could not be collected. The other soil vapor samples were submitted to a laboratory and analyzed for volatile organic compounds (VOCs) (EPA Test Method TO-15) and fixed gases oxygen, methane, and carbon dioxide (ASTM D-1946). In addition, one air sample was collected from the shroud atmosphere and analyzed for isopropyl alcohol.

On June 14, 2022, Cornerstone remobilized to the Site and over-drilled the vapor probes using direct push equipment. The borings were advanced to an approximate depth of 15 feet and were tremie grouted upon completion.

### **9.3 ANALYTICAL RESULTS**

The laboratory analytical reports and chain-of-custody forms are attached in Appendix E. The detected compounds are summarized in the Data Tables section of this report. The soil and soil vapor analytical results were compared to residential and commercial Environmental Screening Levels (ESLs) established by the San Francisco Bay Regional Water Quality Control Board (Water Board, 2019). Consistent with the ESL guidance document (2019), the 99th percentile upper estimate arsenic concentration published by Duvergé (2011) of 11 milligrams per kilogram (mg/kg) was substituted for the ESL. Total DDT (sum of 4,4-DDE, DDD, and DDT) concentrations were compared to its Total Threshold Limit Concentration (TTLC) established in Title 22 California Code of Regulations. The TTLC is the level at which a solid waste is considered hazardous and is pertinent when evaluating waste disposal options.

## **SECTION 10: FINDINGS, OPINIONS, AND CONCLUSIONS**

Cornerstone performed this Phase I ESA in general conformance with ASTM E1527-21 to support Hunter Development Partners, LLC in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

## 10.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, by the 1930s the Site was developed with several small structures that appear to have been residences and associated outbuildings. Portions of the Site may also have been used for agricultural purposes. Additional residential structures were constructed on-Site by the 1950s.

By 1940, a commercial building was constructed on the northeast corner of the Site (2851 41st Avenue) that was occupied by Johnny's Food Market (1960), Coast Lighting & Hardware (1974-1980) and King's Paint & Paper (1985-2018). Spencer's Audio Video Service Co. (1985) and Plumbed Elegance (1992-2005) also were identified as concurrent occupants. This building was demolished in approximately 2019.

A commercial structure also was present on the northwest corner of the Site (3820 Soquel Drive) by the 1950s that was occupied by Garbini's Inn/Restaurant (1960-1973) and Art & Walt's Original Garbini Inn (1974-1980). This building was removed by the early 1980s and the parcel subsequently was used as an exterior storage yard; Affordable Hauling and Round Up Recycling were identified as occupants.

An on-Site building at 3912 Soquel Drive previously was occupied by Ted's Motorcycle Shop (1960), a self-service laundromat (1961-1964), Royal Service & Sales (an apparent small appliance sales/service business) (1971-1980), Santa Cruz Building (1985) and Computer Jones (1995). A self-service car wash was constructed at this location in 1995; it was demolished in approximately 2019.

A former residence at 2755 41<sup>st</sup> Avenue also was noted to have been occupied by a few commercial businesses including a palm reader (1980), Royal Service & Sales (1985), Cellular Service Center (1992) and Shaffer Communications (1995).

The Site currently consists of undeveloped land.

## 10.2 CHEMICAL STORAGE AND USE

Paint related products previously were stored on-Site at King's Paint & Paper, a retail paint store. Ted's Motorcycle Shop, an occupant of 3912 Soquel Drive in 1960, may also have used and stored hazardous materials. No spills have been reported at the Site and no significant quantities of hazardous materials were observed on-Site during our visit.

## 10.3 SOIL QUALITY

As described in Section 9, soil sampling was performed to evaluate potential impacts to soil quality associated with potential agricultural uses at the Site and to evaluate soil quality near selected former on-Site structures. Laboratory analyses of the soil samples did not detect OCPs, arsenic, or lead above their respective residential environmental screening criteria except in one soil sample that contained chlordane at a concentration exceeding its residential ESL but less than its commercial ESL. As shown in Figure 2, this sample was collected at 2851 41<sup>st</sup> Avenue (former Kings Paint store). Chlordane was commonly used for termite control near the foundations of wood-framed structures.

## 10.4 SOIL VAPOR QUALITY

To evaluate general soil vapor quality, soil vapor samples were collected from six locations at the Site to evaluate potential impacts associated with the former on-Site car wash and paint store, off-Site closed LUST cases, and the existing off-Site and adjacent car wash and gasoline service station. As shown in Data Summary Table 2, several VOCs were detected in the soil vapor samples but none exceeded their respective residential ESL except for benzene, 1,3-butadiene, chloroform, naphthalene, carbon tetrachloride, trichloroethene (TCE). Of these compounds, benzene, 1,3-butadiene, chloroform and naphthalene also exceeded their respective commercial ESL. One or more of the above compounds was detected in each of the soil vapor samples above its residential or commercial ESL except at location SV-3 (near the former Kings Paint store). Soil vapor exceedances are shown on Figure 3.

## 10.5 IMPORTED SOIL

If the planned development will require importing soil for Site grading, we recommend documenting the source and quality of imported soil. The DTSC's October 2001 Clean Fill Advisory provides useful guidance on evaluating imported fill.

## 10.6 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site. However, as is typical to many commercial areas, several facilities in the vicinity were reported as hazardous materials users. If leaks or spills occur at these facilities, contamination could impact the Site, depending upon the location of the property, the magnitude of the release, and the effectiveness of cleanup efforts.

## 10.7 DATA GAPS

ASTM Standard E1527-21 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by the ASTM Standard despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- Contact information for the former occupants and owners of the Site was not provided to us. Thus, former occupants and owners were not interviewed during this study. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. However, these individuals may have knowledge of the Site that is not otherwise readily available or apparent. Thus, the absence of these interviews may diminish our ability to identify Recognized Environmental Conditions.

## 10.8 DATA FAILURES

As described by ASTM Standard E1527-21, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon

when attempting to identify the use of a Site at five year intervals back to the first use or to 1940 (whichever is earlier). The ASTM Standard requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data failures were identified during this Phase I ESA.

## 10.9 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E1527-21 of 2755 41<sup>st</sup> Avenue in Soquel, California. This assessment identified the following Recognized Environmental Conditions<sup>3</sup>.

- Soil samples were collected from the Site to evaluate potential soil impacts from prior agricultural uses and/or former structures. Chlordane was detected above its residential ESL in the soil sample collected from the on-Site parcel addressed as 2851 41<sup>st</sup> Avenue. Chlordane was commonly used for termite control near the foundations of wood-framed structures.
- As part of this study, soil vapor samples were collected from the Site to evaluate the potential for vapor intrusion concerns for future development. Benzene, 1,3-butadiene, chloroform, naphthalene, carbon tetrachloride, and TCE were detected at concentrations above their respective ESLs.

This assessment did not identify any Controlled Recognized Environmental Conditions<sup>4</sup> or Historical Recognized Environmental Conditions<sup>5</sup> associated with the Site.

## 10.10 ENVIRONMENTAL ATTORNEY

Due to known Recognized Environmental Conditions at the Site, we recommend consulting with an environmental attorney regarding liabilities associated with acquiring the Site and reporting obligations.

## SECTION 11: LIMITATIONS

Cornerstone performed this Phase I ESA to support Hunter Development Partners, LLC in evaluation of Recognized Environmental Conditions associated with the Site and soil and soil vapor quality beneath the Site. Hunter Development Partners, LLC understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site and the extent of soil and soil vapor data obtained is based

---

<sup>3</sup> Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

<sup>4</sup> A Recognized Environmental Condition that has been addressed to the satisfaction of the applicable regulatory agency with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

<sup>5</sup> A previous release of hazardous substances or petroleum products affecting the Site that has been addressed to the satisfaction of the applicable regulatory agency and meeting unrestricted use criteria established by the applicable regulatory agency without subjecting the Site to any controls.

on the reasonable limits of time and budgetary constraints. In addition, the chemical information presented in this report can change over time and is only valid at the time of this investigation and for the locations sampled.

This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. Hunter Development Partners, LLC understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E1527-21, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

Hunter Development Partners, LLC may have provided Cornerstone environmental documents prepared by others. Hunter Development Partners, LLC understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

This report, an instrument of professional service, was prepared for the sole use of Hunter Development Partners, LLC and may not be reproduced or distributed without written authorization from Cornerstone. Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

### **11.1 REPORT VIABILITY**

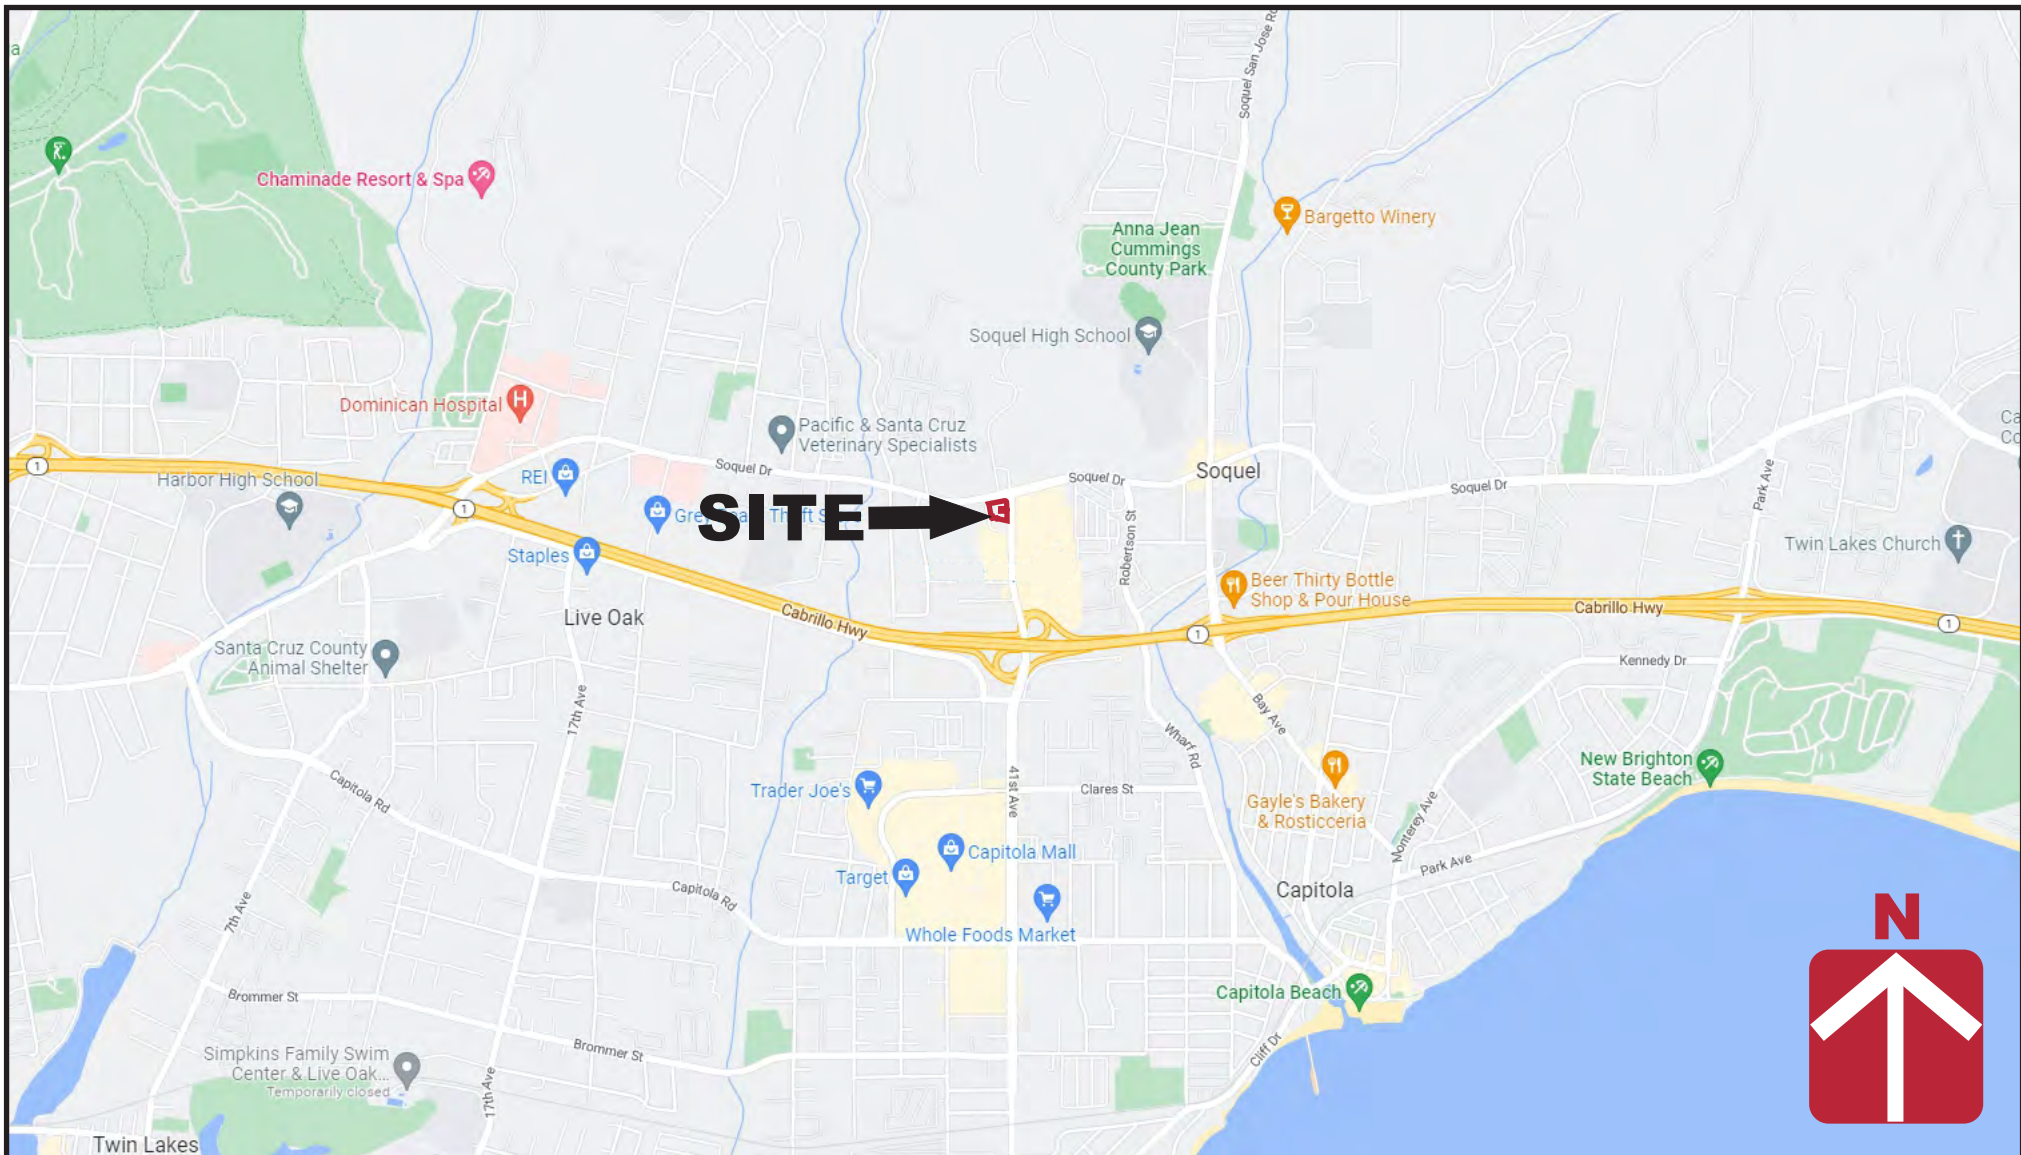

Per ASTM E1527-21 and 40 CFR Part 312, a Phase I Environmental Site Assessment report is presumed to be viable when it is conducted within one year prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction), provided that the following components of the inquiries were conducted or updated within 180 days prior to the date of purchase or the date of the intended transaction:

| <b><u>Task</u></b>                                 | <b><u>Date Completed</u></b> |
|--|------------------------------|
| Interview with current owner (owner questionnaire) | June 2                       |

|  |                |
|--|----------------|
| Interview with current occupant                            | Not applicable |
| Review of standard government environmental record sources | May 27, 2022   |
| Visual inspection of the Site and of adjoining properties  | June 2, 2022   |
| Declaration by the Environmental Professional              | July 8, 2022   |
| Searches for recorded environmental cleanup liens          | April 22, 2022 |

1 Environmental Screening Level (ESL), RWQCB, San Francisco Bay Region - January 2019.

2 ESL is not established. Value is calculated soil vapor screening level using indoor air Regional Screening Level (RSL), USEPA Region 9 - May 2022 and an attenuation factor of 0.03.

< Not detected at or above laboratory reporting limit shown

NE Not Established

NA Not Applicable

--- Not analyzed and/or other Environmental Screening Criteria not shown.

**BOLD** Concentration exceeds residential screening level

**BOLD** Concentration exceeds commercial screening level

Red Font **Red font** indicates the laboratory reporting limit shown exceeds one or more of the selected screening levels.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

2851 41ST AVENUE  
SOQUEL, CA 95073

#### COORDINATES

Latitude (North): 36.9867410 - 36° 59' 12.26"  
Longitude (West): 121.9656460 - 121° 57' 56.32"  
Universal Transverse Mercator: Zone 10  
UTM X (Meters): 592052.4  
UTM Y (Meters): 4093698.2  
Elevation: 124 ft. above sea level

## **DATABASES WITH NO MAPPED SITES**

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

## EXECUTIVE SUMMARY

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

US ENG CONTROLS..... Engineering Controls Sites List

US INST CONTROLS..... Institutional Controls Sites List

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE..... State Response Sites

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF..... Solid Waste Information System

### ***Lists of state and tribal leaking storage tanks***

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

### ***Lists of state and tribal registered storage tanks***

FEMA UST..... Underground Storage Tank Listing

INDIAN UST..... Underground Storage Tanks on Indian Land

### ***Lists of state and tribal voluntary cleanup sites***

VCP..... Voluntary Cleanup Program Properties

INDIAN VCP..... Voluntary Cleanup Priority Listing

### ***Lists of state and tribal brownfield sites***

BROWNFIELDS..... Considered Brownfields Sites Listing

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

### ***Local Lists of Landfill / Solid Waste Disposal Sites***

WMUDS/SWAT..... Waste Management Unit Database

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/24/2022 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Hazardous waste / Contaminated Sites**

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 01/18/2022 has revealed that there are 18 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

Cleanup Status: COMPLETED - CASE CLOSED

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 18 CUPA Listings sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto

## EXECUTIVE SUMMARY

sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

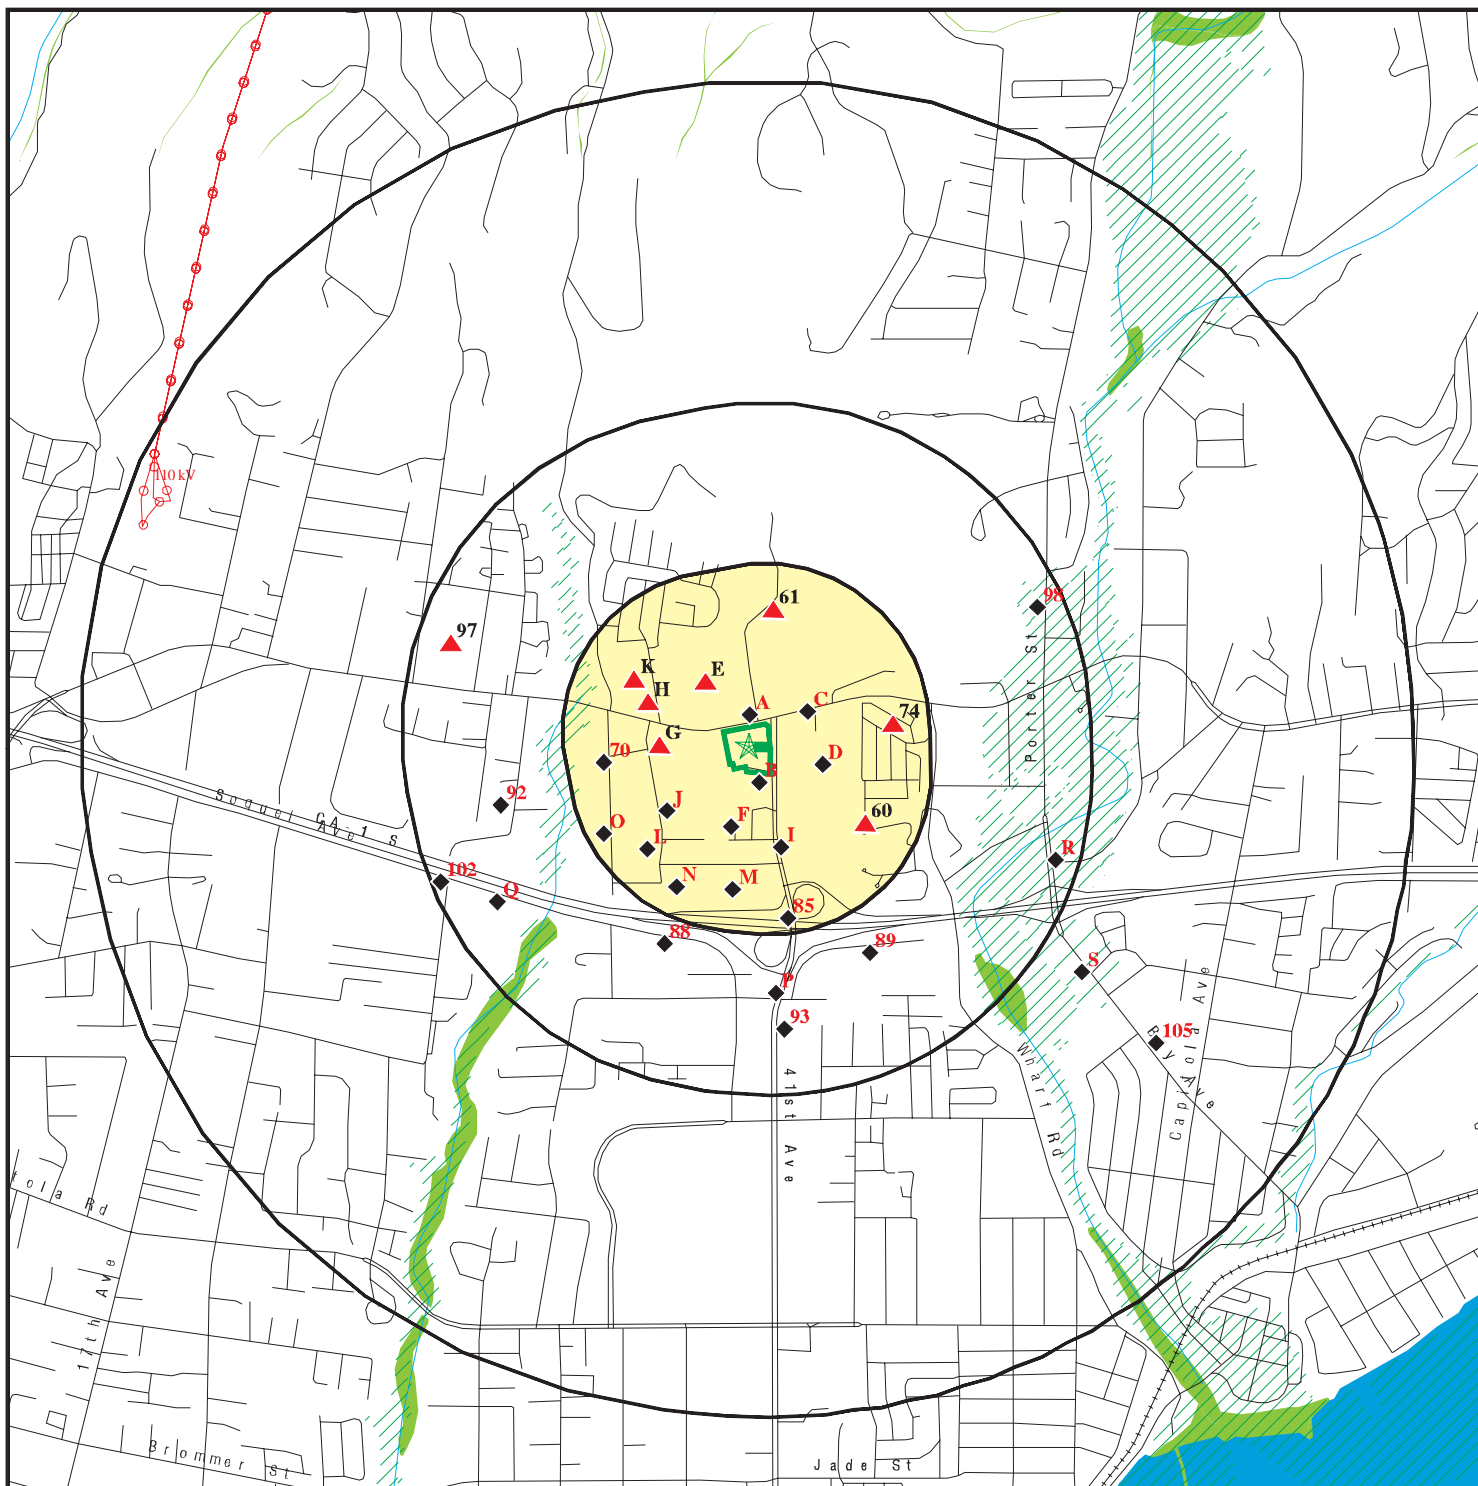

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Eval Notes: Ashish Patel, owner/operator, granted me permission to inspect UST Monitor Certification Testing, Overfill Prevention testing and Spill Bucket testing. No signature was obtained due to COVID-19 Annual monitor certification testing, spill bucket testing, and overfill prevention testing was performed. Overfill prevention equipment and spill bucket could NOT be tested on 87 fuel grade 12,000 gallon tank because service contractor could not remove drop tube. PLEASE NOTIFY ME 48 HOURS BEFORE RETESTING OF THE OVERFILL PREVENTION RE-TEST. Monitor Certification testing passed, and 89 and 91 fuel grade tanks both passed overfill prevention equipment inspection tests and spill bucket testing. During inspection of Designated Operator (DO) reports, I found that the DO had written in Section 3 of the report, dated 2/15/21, that water was found in the STP sumps. The DO stated that the water was pumped out and placed in a barrel "on-site," but after a walk-through of the [Truncated]

 Violation Date: 07-05-2019  
 Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)  
 Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
 Violation Notes: Returned to compliance on 07/31/2019. Used oil accumulation start date on drum older than one year, disposal receipt and operators information indicates that the hazardous waste is not disposed of at the required frequency. Dispose of hazardous waste within 180 days of the start of accumulation date

of drained used oil filters located in the hazardous waste storage area was observed with an accumulated start date of September 23, 2015. Drained used oil filters must be transported to a scrap metal recycling facility within one year of the accumulation start date. Used oil filters in the 16 gallon drum of drained used oil filters do not show evidence of proper drainage (not punctured or crushed). Regulations allow generators to manually manipulate the anti drain-back valve to allow the free-flowing oil to exit the filter. However, this valve manipulation can be difficult and time-consuming, because the valve must be held open long enough to allow the oil to drain. It can also be difficult to hold the filter at the proper angle as the valve is being held open. Crushing or puncturing filters prior to gravity-draining (with a hole at the lowest point of the filter and a hole in the side of the filter to facilitate drainage) is the most [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site today to observe the management of hazardous materials, training and record keeping. This facility is a machine shop with several CNC machines. They use a form of mineral oil mixed with water for cooling the materials they machine. When the oil becomes worn out they dispose of it through a licensed company. Hazardous waste is kept in secondary containment and they keep a haz waste label on the wall. No violations were observed here today.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

| Quarterly Update:                  | Calif Radiographics Inc (CRI) originally operated under a Standardized Permit and was granted Interim Status on 5/27/1994 to the EPA ID# CAD982482390. CRI receives silver bearing spent photographic solution from customers that they then extract silver sludge from that they send to a precious metal refiner. CRI operated at 375 Coral St, Santa Cruz until their lease was up and they decided to move their facility |

to 3335 Soquel Dr, Soquel and applied for a new EPA ID# CAL000115947. CRI submitted a Closure Plan for their Santa Cruz location which was approved and operations seemed to continue at their new site though it is unclear whether the Soquel location ever obtained a permit. There is no information about either location after 1995, but SB 2111 came out after that which states silver only sites will no longer be regulated after January 1, 1999. Both facilities will no longer be subject to Hazardous Waste Permit and closure requirements. Therefore, both locations and EPA ID's for CRI are being Administratively Closed since they are "silver only" sites.

**Violations:**

Site ID: 53532  
Site Name: IH0009 VALVOLINE INSTANT OIL CHANGE  
Violation Date: 04-20-2021  
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7

Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

**Violation Notes:**

Returned to compliance on 06/04/2021. Observation: Previously used empty 55 gallon drums are stored in "Trash shed" without a date when it was emptied. Within one year, empty drums need to be shipped for reconditioning or remanufacturing. Correction: Dispose of empty drums for reconditioning or remanufacturing.

Violation Date: 09-06-2018  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.  
Violation Notes: Returned to compliance on 02/01/2019. OBSERVATION: The business failed to electronically submit and certify in the California Environmental Reporting System (CERS) that the Hazardous Materials Business Plan (HMBP) is complete and accurate on or before the annual due date. The CERS submittal dated March 29, 2018, did not include the Aboveground Petroleum Storage Act (APSA) section. The last CERS submittal that included the APSA section is dated July 25, 2017. The July 25, 2017, CERS submittal indicates the APSA documentation is "Stored at Facility" in error. The CERS submittal should indicate the APSA documentation is "Provided Elsewhere in CERS," and indicate in the CERS "Hazardous Materials Inventory." Additionally, the current submittal in the California Environmental Reporting System (CERS) includes an incomplete "Santa Cruz County, Additional Locally Collected Information" form [SC County Code 7.100.060]. CORRECTIVE ACTION: Electronically submit and certify in the CERS that the HMBP is complete and [Truncated]

Violation Notes: Returned to compliance on 06/04/2021. Observation: On CERS, business plan is incomplete and/or inaccurate. In "Business Activities" Section, EPA ID number does not match facility name and address. In "Hazardous Materials Inventory" section, current inventory does not include used oil filters(paper/metal) stored in "Trash" shed on the site map. In addition, hazardous materials are stored in the Trash shed but not indicated on the site map. Correction: Update the EPA ID number on CERS. Update the hazardous materials inventory on CERS to include used oil filters, paper and metal. Update the site map to show where all hazardous materials are stored on the premises including the "Trash" shed.

Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site today to observe the management of hazardous materials/waste, training and record keeping. All hazardous materials and waste are stored properly with secondary containment. The majority of the oils are kept in the basement which has no drain. The manager states that the facility has sold and will be going through a change of ownership in about two weeks. Facility has a 1000 gallon waste oil tank and it is picked up weekly. Operator keeps all hazardous waste manifests in order and well organized. Manager performs weekly inspections on all containers of oil and hazardous waste. Hazardous waste area is kept organized. Training is provided for all employees yearly through a third party contractor, on line and in house as well. The SPCC is complete and was last reviewed in 2018. All hazardous waste labels were filled out properly and kept up to date. No violations were observed here today.

Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site today to observe the management of hazardous materials/waste, training and record keeping. All hazardous materials are stored properly with secondary containment. Observed the waste oil tank missing a Hazardous Waste Label. Keep a hazardous waste label on all hazardous waste containers filled out properly. Once you have the hazardous waste label on the tank fill out the "Return to Compliance" form provided and send a copy to the Environmental Health office. The other hazardous waste containers had labels on them and were filled out properly. Shop is kept neat and organized. Training is done yearly for employees and operator keeps records in order. Operator keeps all hazardous waste manifests. No other violations were observed here today.

**Violations:**

Site ID: 28010  
 Site Name: ELEVATOR SERVICE CO INC  
 Violation Date: 12-18-2018  
 Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: Returned to compliance on 06/29/2019. OBSERVATION: The business failed to electronically submit and certify in the California Environmental Reporting System (CERS) that the Hazardous Materials Business Plan (HMBP) is complete and accurate on or before the annual due date. CERS submittal are required to be submitted electronically annually. The last CERS submittal for this facility is dated July 25, 2016. Additionally, your hazardous materials inventory needs to be updated in the CERS. The new oil (Hydraulic Fluid) aboveground storage tank is a 220 gallon tank and not 200 gallons as indicated in the CERS. The propane tank (approximately 10 gallons) used to power the fork lift also should be added to the hazardous materials inventory. Also, in the hazardous materials inventory in CERS, you need to deselect the 5 Federal Hazard Categories and select the appropriate 24 new Federal Hazard Categories for each chemical in your CERS hazardous materials

response plan and procedures for a release or threatened release of a hazardous material.  
Returned to compliance on 08/08/2016.

Violation Notes: Returned to compliance on 08/08/2016.  
Violation Division: Santa Cruz County Environmental Health  
Violation Program: HMRRP  
Violation Source: CERS,

Site ID: 28010  
Site Name: ELEVATOR SERVICE CO INC  
Violation Date: 12-18-2018  
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 06/10/2021. OBSERVATION: The business did not provide documentation and/or maintain records of employee training for a minimum of three years. Business facilities that store hazardous materials and/or hazardous wastes must provide initial training for new hires within six months of the employees hire date and ongoing annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous materials including familiarity with the emergency response plan. The business facility must document and maintain training records for a minimum of three years. CORRECTIVE ACTION: Provide all employees with required training that includes: safe handling hazardous materials, emergency response procedures, and proper use of response equipment. Within 30 days, submit documentation to the CUPA demonstrating appropriate personnel have received their appropriate training and maintain these training records for a minimum of three years.

Violation Date: 01-11-2018  
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)  
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.  
Violation Notes: Returned to compliance on 02/07/2018. OBSERVATION: Uniform Hazardous Waste Manifests for the waste antifreeze (propylene glycol) were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for waste antifreeze (propylene glycol) and submit copies to the Certified Unified Program Agency (CUPA).

Violation Date: 01-11-2018  
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22  
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.  
Violation Notes: Returned to compliance on 02/07/2018. OBSERVATION: The 55 gallon drum of used oil filters located in the shipping container was observed without a lid. Additionally, the bills of lading (receipts) for used oil and drained used fuel filters for the past three years were not available at the time of inspection. CORRECTIVE ACTION: Submit photos to the Certified Unified Program Agency (CUPA) demonstrating that the 55 gallon drum of drained used fuel filters are being properly managed with a closed lid and obtain copies of all bills of lading (receipts) for used oil and drained used fuel filters for the past three years and submit copies to the CUPA.

Violation Source: CERS,

Site ID: 369750  
Site Name: Noram Auto Service  
Violation Date: 01-11-2018  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.  
Violation Notes: Returned to compliance on 02/26/2018. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. The hazardous materials inventory submitted in the California Environmental Reporting System (CERS) indicates the facility has 50 gallons of Waste Oil, Waste antifreeze, and Used Oil Filters (Drained); however, the facility has a 55 gallon drum of for each of these materials. Therefore, for these materials the quantity/volume in the Hazardous Material Inventory in CERS should indicate 55 gallons. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities.

**Facility Status: Completed - Case Closed**  
Status Date: 10/30/2015  
Global Id: T10000007213  
Lead Agency: SANTA CRUZ COUNTY  
Lead Agency Case Number: RO0000358  
Latitude: 36.9817  
Longitude: -121.96225  
Case Type: Cleanup Program Site  
Case Worker: JBG  
Local Agency: SANTA CRUZ COUNTY  
RB Case Number: Not reported  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Potential Media Affected: Soil  
Potential Contaminants of Concern: Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating  
Site History: This GeoTracker case is for the petroleum hydrocarbon contaminated soil associated with the former hydraulic hoists and former oil/water separator (clarifier) and not for the former waste oil UST and associated piping at the site.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violation Division: Santa Cruz County Environmental Health  
Violation Program: UST  
Violation Source: CERS,

Site ID: 389333  
Site Name: CAPITOLA COAST  
Violation Date: 06-28-2021  
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: Returned to compliance on 07/28/2021. OBSERVATION: Diesel and 91 octane spill buckets lost water during testing. CORRECTION/CORRECTIVE ACTIONS: An inspection report on 05/26/2021 stated that the diesel and 91 octane spill buckets be replaced in a fill sump or replaced with double-walled spill buckets. This was required to be done immediately, but were given a comply date of 06/25/2021. An email was also sent to Shyamla Ganapathy at shyamla@hadadinc.com on 06/22/2021 asking that the repair permit and fee for the replacement of the spill buckets be given to our office immediately, which still has not been received. Therefore, the diesel and 91 octane fuel tanks require immediate red tagging: Per 23 CCR Div. 3 Ch. 16 Article 10.5 section 2717.1 (a) states: ) Upon the discovery of a significant violation that poses an imminent threat to human health or safety or the environment, the local agency may immediately affix a red tag to the fill pipe of the non-compliant underground storage tank system using a [Truncated]

Violation Description: Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.  
Violation Notes: The alarm history shows alarms on 01-29-21, 01-31-21 and 02-01-21 but section 3 of the DO report for those dates indicates that there is nothing to report. Alarms should be noted in section 3 of the report as per instructions on the report and acknowledged within 72 hours of receipt by the owner or operator with actions to be taken in response to the alarms in section 5 of the report.

Violation Notes: hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
The container holding liquid hazardous waste had a start of accumulation date of 02-20-18 and no manifests were produced to show that hazardous wastes had been disposed of since then. Dispose of all hazardous waste within 180 days or 270 days, as applicable, from the start of accumulation date.

Violation Date: 05-26-2021  
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: Diesel and 87 octane spill buckets lost water during testing. Replace the failed spill buckets. Replacement buckets shall either be installed in a fill sump or shall be double walled. Submit replacement permit applications immediately.

LUST REG 3:

Region: 3  
Regional Board: Central Coast Region  
Facility County: Santa Cruz  
Global ID: T0608700250  
Status: Case Closed  
Case Number: 620  
Local Case Num: Not reported  
Case Type: O  
Substance: Gasoline  
Quantity: Not reported  
Abatement Method: Excavate and Treat - remove contaminated soil and treat (includes spreading or land farming), Pump and Treat Ground Water - generally employed to remove dissolved contaminants, Vent Soil - bore holes in soil to allow volatilization of contaminants  
Leak Source: Piping  
Leak Cause: Corrosion  
How Stopped: Not reported  
How Discovered: Tank Closure  
Release Date: 08/20/1987  
Discovered Date: 8/20/87

samples collected during a 2008 confirmation soil boring assessment were below environmental screening levels for residential land use. The site is located at 2501 South Main Street in Soquel and currently operates as a privately owned, Valero-branded retail service station dispensing unleaded gasoline and diesel fuels. In August 1990, two 10,000 gallon single-walled gasoline tanks and one 6,000 gallon gasoline tank and their associated piping were removed from the eastern portion of the site. In addition, the owners commissioned the excavation of soil from the base of the tank cavity. Consultants removed and disposed of 250 cubic yards of contaminated soil. Three 12,000 gallon double-walled fiberglass USTs were installed in a new tank basin to the west of the dispenser islands. The responsible party installed groundwater monitoring wells in February 1991 and sampled the wells in March and June of 1991. The results indicated that dissolved-phase petroleum hydrocarbons were not present in the groundwater samples collected from these wells. In August 1991, Santa Cruz County Environmental Health Services (SCCEHS) closed the case and the on-site monitoring wells were destroyed. Analytical results from a Phase II investigation in 1997 showed elevated concentrations of total petroleum hydrocarbons as gasoline (TPH-g), MTBE and tertiary-butyl alcohol (TBA) in groundwater beneath the site. The Central Coast Water Board re-opened the case at that time based on the discovery of residual contamination in the soil and groundwater. The responsible party monitored the contamination as it attenuated naturally to its current levels. Residual soil contamination still exists on-site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or de-watering. The Central Coast Water Board, the Santa Cruz County Environmental Health Services (SCCEHS), and the appropriate local planning and building departments must be notified prior to any grading activities, excavation, or dewatering. This notification must include a statement that residual soil and groundwater contamination underlie the property and nearby properties. If the land use changes from an active commercial petroleum fueling facility, the SCCEHS must be notified for consideration of additional investigation or remediation requirements. Notice of this condition shall remain with the land until verification of remediation is approved by the SCCEHS.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

|   | Data Release Frequency: Quarterly      |

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Next Scheduled EDR Contact: 07/11/2022  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

|   | Data Release Frequency: Varies          |

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Number of Days to Update: 78

Next Scheduled EDR Contact: 08/08/2022

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/24/2022

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 02/23/2022

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/22/2022

## Local Land Records

### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 02/24/2022  
Date Data Arrived at EDR: 02/25/2022  
Date Made Active in Reports: 03/09/2022  
Number of Days to Update: 12

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 05/25/2022  
Next Scheduled EDR Contact: 09/12/2022  
Data Release Frequency: Varies

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 01/25/2022

Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

| SOQUEL                             | <u>Data Coverage</u>                           |
|                                    | YES - refer to the Overview Map and Detail Map |

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

|                |            |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status:        | Not found  |

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION</u> | <u>GENERAL DIRECTION</u> |

|               | <u>FROM TP</u>  | <u>GROUNDWATER FLOW</u>  |
| Not Reported  |                 |                          |

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: WATSONVILLE

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 114 inches

| Soil Layer Information |           |           |                    |   |   |  |                      |

**Soil Map ID: 3**

Soil Component Name: WATSONVILLE

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 114 inches

### Soil Map ID: 4

Soil Component Name: SOQUEL

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 0DBC-489B-B729

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Cornerstone Earth Group (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

| <u>Year</u> | <u>Target Street</u>                | <u>Cross Street</u>                 | <u>Source</u>         |

**APPENDIX D – QUESTIONNAIRE**

**Environmental Questionnaire  
(Owner Questionnaire)**

Cornerstone Earth Group is performing a Phase I environmental site assessment (ESA). The purpose of the ESA is to evaluate current and historic uses of the property that may have involved the use, generation, or storage of hazardous materials. Please respond to these questions in good faith and to the extent of your knowledge. Enter "unknown" if the requested information is not known. Thank you for your assistance and timely response.

**GENERAL PROPERTY INFORMATION**

- 1) **Site Address(es) and Assessor's Parcel Number(s):** Please list all current and former addresses. Some sites have multiple addresses; all are needed, even if they are not in current use.

|  |                      |
|--|----------------------|
| <u>Address(es)</u>   | <u>APN Number(s)</u> |
| 030-121-06, 030-027-07, 030-121-27, 030-121-07, 030-121-12, 030-121-13, 030-121-53 |                      |
| 030-121-57   |                      |

- 2) **Property Size:** Approx 115,000 sq ft (Sq. Ft. or Acres)

- 3) **Current site owner(s) and purchase date:**

|                           |                       |
|---------------------------|-----------------------|
| <u>Current Owner Name</u> | <u>Year Purchased</u> |
| BLAM-JADE LP              | 2017                  |

- 4) **Previous site owner(s) and dates of ownership:**

| <u>Prior Owner Name</u> | <u>Year Purchased</u> | <u>Year Sold</u> |
|-------------------------|-----------------------|------------------|
| Joe & Karen Calcagno    | unknown               | 2017             |
| Bei-Scott Properties    | unknown               | 2017             |

**STRUCTURES AND OCCUPANTS**

- 5) **Please describe all on-site buildings (current and former):**

|                               |                     |                             |
|-------------------------------|---------------------|-----------------------------|
| <u>Building Size (sq. ft)</u> | <u>Building Use</u> | <u>Date of Construction</u> |

---

Can copies be provided? Yes  X  No

**10) Have significant quantities of hazardous materials been used, stored, or generated on-site?**

Yes   No  X

If so, please describe the types and quantities and where these materials are or were located.

---

---

---

11) Are you aware of commonly known or reasonably ascertainable information about the site or adjoining properties that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, do you know of 1) past uses involving hazardous materials at the site or adjoining properties, 2) specific chemicals that were or are present at the site or adjoining properties, 3) spills or other chemical releases at the site or adjoining properties, or 4) any environmental cleanups at the site or adjoining properties?

Yes \_\_\_\_\_ No  X

If so, please briefly describe below, including whether reports documenting the activities are available for review by Cornerstone Earth Group.

---

---

12) Are you aware of any Environmental Liens or Activity and Use Limitations (AULs) (such as engineering controls, land use restrictions, or institutional controls) that are in place or filed or recorded against the subject property under federal, tribal, state, or local law?

Yes \_\_\_\_\_ No  X

If so, please briefly describe below.

---

---

13) Are you aware of 1) any pending, threatened or past litigation, or administrative proceedings relevant to hazardous substances or petroleum products at the site, or 2) any notices from any governmental entity regarding possible violations of environmental laws or possible liability related to hazardous substances or petroleum products?

Yes \_\_\_\_\_ No  X

If so, please briefly describe below.

Work Order No.: 2206102 Rev: 2

Dear Kurt Soenen:

Torrent Laboratory, Inc. received 13 sample(s) on June 13, 2022 for the analyses presented in the following Report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

A handwritten signature in blue ink that reads "Kathie Evans". The signature is written in a cursive style and is positioned above a horizontal line.

### CASE NARRATIVE

---

Unless otherwise indicated in the following narrative, no issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Laboratory, Inc

Data is reported on a dry weight basis.

Revisions:

Report revised to provide J flag on 4,4'-DDE value on sample -009A. No QC data was affected by this revision.

Rev 1 (6/23/22)

Report revised to include Arsenic data for all samples

Rev. 2 (7/1/22)

## Sample Result Summary

## Laboratory Qualifiers and Definitions

### DEFINITIONS:

|   |
|---|
| <b>Accuracy/Bias (% Recovery)</b> - The closeness of agreement between an observed value and an accepted reference value.   |
| <b>Blank (Method/Preparation Blank)</b> -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.   |
| <b>Duplicate</b> - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)  |
| <b>Laboratory Control Sample (LCS ad LCSD)</b> - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.   |
| <b>Matrix</b> - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)  |
| <b>Matrix Spike (MS/MSD)</b> - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.  |
| <b>Method Detection Limit (MDL)</b> - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero  |
| <b>Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ)</b> - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.   |
| <b>Precision (%RPD)</b> - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates   |
| <b>Surrogate (S) or (Surr)</b> - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis  |
| <b>Tentatively Identified Compound (TIC)</b> - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.   |
| <b>Units:</b> the unit of measure used to express the reported result - <b>mg/L</b> and <b>mg/Kg</b> (equivalent to PPM - parts per million in <b>liquid</b> and <b>solid</b> ), <b>ug/L</b> and <b>ug/Kg</b> (equivalent to PPB - parts per billion in <b>liquid</b> and <b>solid</b> ), <b>ug/m<sup>3</sup></b> , <b>mg/m<sup>3</sup></b> , <b>ppbv</b> and <b>ppmv</b> (all units of measure for reporting concentrations in air), % (equivalent to 10000 ppm or 1,000,000 ppb), <b>ug/Wipe</b> ( concentration found on the surface of a single Wipe usually taken over a 100cm <sup>2</sup> surface) |

### LABORATORY QUALIFIERS

|   |
|---|
| <b>B</b> - Indicates when the analyte is found in the associated method or preparation blank  |
| <b>D</b> - Surrogate is not recoverable due to the necessary dilution of the sample   |
| <b>E</b> - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.               |
| <b>H</b> - Indicates that the recommended holding time for the analyte or compound has been exceeded  |
| <b>J</b> - Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative   |
| <b>NA</b> - Not Analyzed  |
| <b>N/A</b> - Not Applicable   |
| <b>ND</b> - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.  |
| <b>NR</b> - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added   |
| <b>R</b> - The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts  |
| <b>S</b> - Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative  |
| <b>X</b> -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative. |

## Sample Receipt Checklist

Client Name: Cornerstone Earth Group

Date and Time Received: 6/13/2022 3:21:00PM

Project Name: Soquel at 41st

Received By: Lorna Imbat

Work Order No.: 2206102

Physically Logged By: Lorna Imbat

Checklist Completed By: Nutan Kabir

Carrier Name: Client Drop Off

### Chain of Custody (COC) Information

Chain of custody present? Yes  
Chain of custody signed when relinquished and received? Yes  
Chain of custody agrees with sample labels? Yes  
Custody seals intact on sample bottles? Not Present

### Sample Receipt Information

Custody seals intact on shipping container/cooler? Not Present  
Shipping Container/Cooler In Good Condition? Yes  
Samples in proper container/bottle? Yes  
Samples containers intact? Yes  
Sufficient sample volume for indicated test? Yes

### Sample Preservation and Hold Time (HT) Information

All samples received within holding time? Yes  
Container/Temp Blank temperature in compliance? Temperature: 4.0 °C  
Water-VOA vials have zero headspace? No VOA vials submitted  
Water-pH acceptable upon receipt? N/A  
pH Checked by: na pH Adjusted by: na

## Laboratory Qualifiers and Definitions

### DEFINITIONS:

|  |
|--|
| <b>Accuracy/Bias (% Recovery)</b> - The closeness of agreement between an observed value and an accepted reference value.  |
| <b>Blank (Method/Preparation Blank)</b> -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.  |
| <b>Duplicate</b> - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)   |
| <b>Laboratory Control Sample (LCS ad LCSD)</b> - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.  |
| <b>Matrix</b> - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)   |
| <b>Matrix Spike (MS/MSD)</b> - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.   |
| <b>Method Detection Limit (MDL)</b> - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero   |
| <b>Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ)</b> - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.  |
| <b>Precision (%RPD)</b> - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates  |
| <b>Surrogate (S) or (Surr)</b> - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis   |
| <b>Tentatively Identified Compound (TIC)</b> - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.  |
| <b>Units:</b> the unit of measure used to express the reported result - <b>mg/L</b> and <b>mg/Kg</b> (equivalent to PPM - parts per million in <b>liquid</b> and <b>solid</b> ), <b>ug/L</b> and <b>ug/Kg</b> (equivalent to PPB - parts per billion in <b>liquid</b> and <b>solid</b> ), <b>ug/m3</b> , <b>mg/m3</b> , <b>ppbv</b> and <b>ppmv</b> (all units of measure for reporting concentrations in air), % (equivalent to 10000 ppm or 1,000,000 ppb), <b>ug/Wipe</b> (concentration found on the surface of a single Wipe usually taken over a 100cm <sup>2</sup> surface) |

### LABORATORY QUALIFIERS

|   |
|---|
| <p><b>B</b> - Indicates when the analyte is found in the associated method or preparation blank</p> <p><b>D</b> - Surrogate is not recoverable due to the necessary dilution of the sample</p> <p><b>E</b> - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.</p> <p><b>H</b>- Indicates that the recommended holding time for the analyte or compound has been exceeded</p> <p><b>J</b>- Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative</p> <p><b>NA</b> - Not Analyzed</p> <p><b>N/A</b> - Not Applicable</p> <p><b>ND</b> - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.</p> <p><b>NR</b> - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added</p> <p><b>R</b>- The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts</p> <p><b>S</b>- Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative</p> <p><b>X</b> -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.</p> |
|---|

## Sample Receipt Checklist

Client Name: Cornerstone Earth Group

Date and Time Received: 6/14/2022 11:44:00AM

Project Name: Soquel Drive @ 41st Ave, Sta Cruz

Received By: Lorna Imbat

Work Order No.: 2206123

Physically Logged By: Lorna Imbat

Checklist Completed By: Lorna Imbat

Carrier Name: Client Drop Off

### Chain of Custody (COC) Information

Chain of custody present? Yes  
Chain of custody signed when relinquished and received? Yes  
Chain of custody agrees with sample labels? Yes  
Custody seals intact on sample bottles? Not Present

### Sample Receipt Information

Custody seals intact on shipping container/cooler? Not Present  
Shipping Container/Cooler In Good Condition? Yes  
Samples in proper container/bottle? Yes  
Samples containers intact? Yes  
Sufficient sample volume for indicated test? Yes

### Sample Preservation and Hold Time (HT) Information

All samples received within holding time? Yes  
Container/Temp Blank temperature in compliance? Temperature: °C  
Water-VOA vials have zero headspace? No VOA vials submitted  
Water-pH acceptable upon receipt? N/A  
pH Checked by: n/a pH Adjusted by: n/a
